## Critical Discourse Analysis

Four Volumes

Edited by **Ruth Wodak** *University of Lancaster*

Since the late 1980s, Critical Discourse Analysis (CDA) has become a well-established field in the social sciences. However, in contrast with some branches of linguistics, CDA is not a discrete academic discipline in the traditional sense, with a fixed set of research methods. The manifold roots of CDA lie in a myriad of disciplines including rhetoric, anthropology, philosophy and cognitive science, to name a few.

This four-volume set brings together seminal articles on the subject from varied sources, creating an invaluable roadmap for scholars seeking to consolidate their knowledge of CDA, and of its continued development. Sculpted and edited by a leading voice in the field, this work covers the interdisciplinary roots, the most important approaches and methodologies of CDA, as well as applications in other disciplines in an updated and comprehensive way.

Structured thematically, the four volumes cover a wide range of aspects and considerations:

**Volume One: Histories, Concepts and Interdisciplinarity**

**Volume Two: Theoretical Approaches and Methodologies**

**Volume Three: 'Doing CDA' - Case Studies**

**Volume Four: Applications and Perspectives - New Trends in CDA**

# The SAGE Handbook of Sociolinguistics

Edited by **Ruth Wodak** *University of Lancaster*,  
**Barbara Johnstone** *Carnegie Mellon University* and  
**Paul E Kerswill** *University of Lancaster*

'A superb volume that weaves together the complex threads of sociological theory, linguistic analysis and practical application that characterise this important and influential field. The contributions offer a range and depth of coverage that is not found elsewhere. Highly recommended for all serious students of the social dimensions of language'

- **Ian Hutchby**, *Professor of Sociology, University of Leicester*

This **Handbook** answers a long-standing need for an up-to-date, comprehensive, international, in-depth critical survey of the history, trajectory, data, results and key figures involved in sociolinguistics.

The Handbook consists of six inter-linked sections:

- The History of Sociolinguistics
- Sociolinguistics and Social Theory
- Language, Variation and Change
- Interaction
- Multilingualism and Contact
- Applications

The result is a work of unprecedented coverage and insight. It is all here, from the foundational contributions to the field to the impact of new media, new technologies of communication, globalization, trans-border fluidities and agendas of research.

The book will quickly be recognized as a benchmark in the field. It will provide a basis for reckoning its origins and pathways of development as well as an authoritative account of the central debates and research issues of today.
